

Enhancing the survival and quality of life of Canadians needing transplantation through leading-edge research

The **CNTRP** is a trans-disciplinary coalition of more than **100** transplant and donation researchers, trainees and collaborators across the country, integrating basic science, clinical and health policy-related investigations into a united effort to improve the lives of Canadians for whom transplantation offers a 'second chance' at health.

The **CNTRP** is the only program in the world that unites researchers from the **DONATION, SOLID ORGAN TRANSPLANT** and **HEMATOPOIETIC CELL TRANSPLANT** arenas into a national integrated research structure.

CNTRP Assets and Services

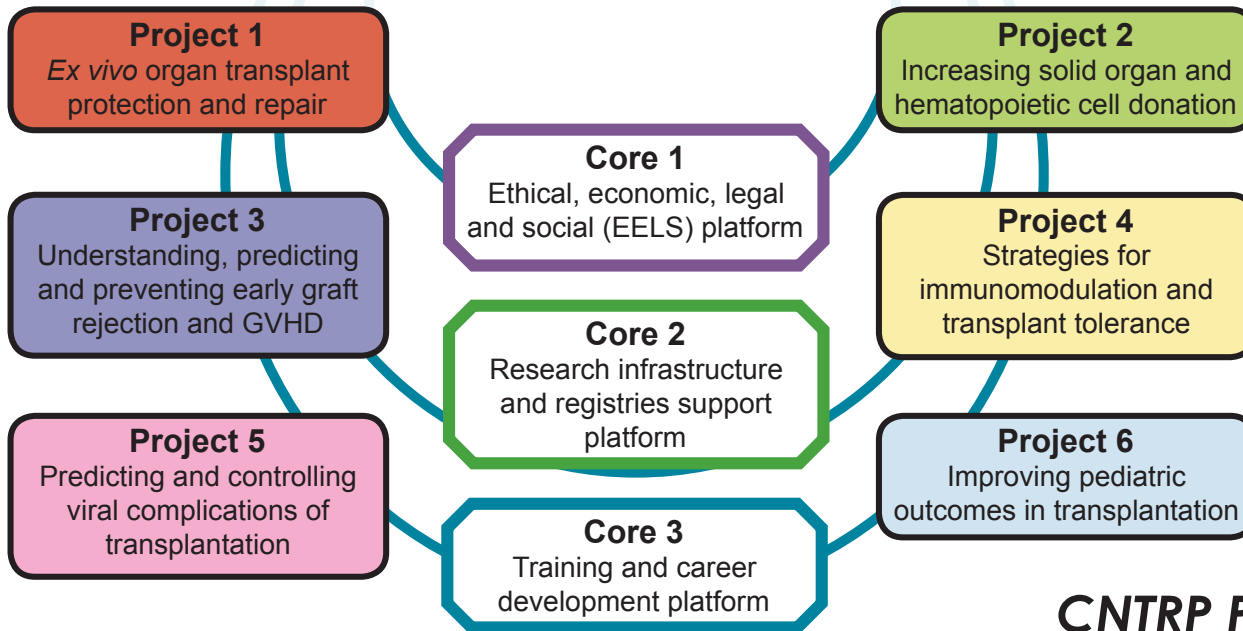

- Clinical Trial Infrastructure • Statistical Support
 - Scientific Review by Peers • Regulatory Support
 - National Training Program
 - Access to Economic, Ethics, Law, Society Cores
 - National Virtual Biorepository • Harmonized SOPs
 - Animal Models • Access to Registration Data Bases
 - Standard Immune Monitoring Panels
 - Organ Procurement Organization (OPO) Research Network
 - Patient & Citizen Engagement Platform
- CNTRP collaborative partnership with the **Montreal Health Innovation and Coordination Centre (MHICC)**

CNTRP Project and Core Structure

CNTRP PNRTC

CNTRP Goals:

- Increase transplant availability
- Extend graft longevity
- Improve long-term survival and quality of life of transplant patients
- Develop and enhance the pool of talent in the transplant field
- Integrate and coordinate transplantation research nationwide

CNTRP Project and Core Leads

Director: Lori West

Co-Director: Marie-Josée Hébert

P1: James Shapiro

P5: Atul Humar

P2: Greg Knoll

P6: Seema Mital

P3: Marie-Josée Hébert

C1: Tim Caulfield

P4: Megan Levings &
Denis-Claude Roy

C2: Kirk Schultz

C3: Lee Anne Tibbles
